YOUR APPLICATION DEVELOPMENT PARTNER

You are looking for a partner to help develop web applications for you or your clients. We are experts in doing the necessary discovery, requirement gathering, design, and development to make your web application intuitive, visually appealing, fast and scalable. We utilize numerous open source frameworks to help you get the best bang for you buck without reinventing the wheel.

ClearScale delivers best of breed services in application development, systems engineering, management, and Cloud Computing integration. We've worked with companies in different verticals (Social, Gaming, Media, Entertainment, E-commerce, Corporate and Non-Profit) and have helped them develop robust web applications to benefit their businesses.

Staff

ClearScale employs an experienced team of Application Developers, Architects, and Systems Engineers who have a proven track record of building complex applications and hosting systems for clients in a variety of verticals.

Methodology

The ClearScale team is skilled in ascertaining your budget, technical and business requirements as well as audience and time line. Our unique set of skills and effective methodology ensures that we help you pick the correct framework, level of customization and complexity for your web application.

Technology

Whether it's a basic company blog, an e-commerce store or a social application with 5 million users, the ClearScale team always utilizes the latest technology to achieve the highest level of innovation, performance, scalability and security. Furthermore, we are well versed in a variety of popular web frameworks and programming languages (PHP, .NET, Java, Ruby and others), which enables us to develop for a variety of verticals and types of applications.
