

We are experts in automating the deployment of computing resources and helping you manage them efficiently.

Specialized Skill-Set

SERVICES

- Deployment Automation
- Centralized Management
- Scaling and Capacity Planning
- High Availability Engineering
- Public, Hybrid and Private Clouds
- High Perf and High Traffic Systems
- Application Migrations
- Scalability and HA Analysis
- Maintenance, Monitoring, Support
- Application Development

PUBLIC CLOUDS

- Amazon
- Rackspace
- Terremark and others

PRIVATE CLOUDS

- Cloud.com
- CloudStack
- Eucalyptus
- Openstack

MANAGEMENT AND AUTOMATION

- RightScale
- Enstratus
- Scalr
- Puppet
- Chef

It's not uncommon to have hundreds if not thousands of servers in a deployment supporting even a semi-popular web application, and having 10's of thousands is not unheard of. On this kind of scale, conventional deployment methods are no longer sustainable and a high level of automation and orchestration is required.

ClearScale delivers best of breed services in Cloud Computing automaton, integration, systems engineering, management, and application development. We've worked with companies in different verticals (Social, Gaming, Media, Entertainment, E-commerce, Corporate and Non-Profit) and have helped them automate the deployment and management of computing resources in Private and Public Clouds. We utilize deployment systems like Puppet and Chef to provision computing resources and use tools like RightScale to manage them with ease reducing your operational costs. Automation is an investment that has a huge ROI and helps you scale your business.

Staff

ClearScale employs an experienced team of Integration Engineers, Architects, and Application Developers who have a proven track record of building complex Cloud hosting systems and deploying applications for clients in a variety of verticals.

Methodology

The ClearScale team is skilled in architecting and deploying Cloud hosting systems that can sustain very high web traffic and millions of users with 99.99% uptime or higher. Our unique set of skills and effective methodology ensures the highest availability and scalability of your web applications.

Technology

Whether it's a basic company blog, architectural design of a hosting system for a social application with 5 million users or deployment and support of a highly-available and scalable file sharing application, the ClearScale team always utilizes the latest technology to achieve the highest level of performance, availability and security. Furthermore, we are well versed in a variety of frameworks and programming languages (PHP, .NET, Java, Ruby and others), which enables us to design hosting architectures in an application centric manner.
