YOUR APPLICATION DEVELOPMENT PARTNER

We are experts in deploying complex applications in the Cloud and helping you achieve unlimited growth and availability.

You realize that running your applications in the Cloud has great scalability, availability and cost benefits, but you are not sure what it will take to launch your critical website or complex application in the Cloud and whether the same rules apply. We are experts in doing the necessary discovery, analysis and planning to make this transition seamless and help you reap all the benefits that Cloud Computing has to offer.

ClearScale delivers best of breed services in Cloud Computing integration, systems engineering, management, and application development. We've worked with companies in different verticals (Social, Gaming, Media, Entertainment, E-commerce, Corporate and Non-Profit) and have helped them take advantage of Cloud Computing technologies to benefit their businesses.

Staff

ClearScale employs an experienced team of Integration Engineers, Architects, and Application Developers who have a proven track record of building complex Cloud hosting systems and deploying applications for clients in a variety of verticals.

Methodology

The ClearScale team is skilled in architecting and deploying Cloud hosting systems that can sustain very high web traffic and millions of users with 99.99% uptime or higher. Our unique set of skills and effective methodology ensures the highest availability and scalability of your web applications.

Technology

Whether it's a basic company blog, architectural design of a hosting system for a social application with 5 million users or deployment and support of a highly-available and scalable file sharing application, the ClearScale team always utilizes the latest technology to achieve the highest level of performance, availability and security. Furthermore, we are well versed in a variety of frameworks and programming languages (PHP, .NET, Java, Ruby and others), which enables us to design hosting architectures in an application centric manner.
