YOUR APPLICATION DEVELOPMENT PARTNER

More and more mission critical web application are deployed in the Cloud, a new frontier for many organizations. Cloud Computing introduces many new security challenges such as multi tenancy, absence of hardware control, lack of hardware firewalls and network isolation between instances.

ClearScale delivers best of breed services in Cloud Computing security, integration, systems engineering, management, and application development. Many popular security tools and approaches don't work with Cloud architectures and new creative ways of securing assets and designing secure hosting architectures are needed. We've worked with companies in different verticals to implement security solutions for their applications running in the Cloud and ensured that their assets were protected. We have also designed solutions to securely link up on premise data centers with one or more Public Clouds.

Staff

ClearScale employs an experienced team of Integration Engineers, Architects, and Application Developers who have a proven track record of building complex Cloud hosting systems and deploying applications for clients in a variety of verticals.

Methodology

The ClearScale team is skilled in architecting and deploying Cloud hosting systems that can sustain very high web traffic and millions of users with 99.99% uptime or higher. Our unique set of skills and effective methodology ensures the highest availability and scalability of your web applications.

Technology

Whether it's a basic company blog, architectural design of a hosting system for a social application with 5 million users or deployment and support of a highly-available and scalable file sharing application, the ClearScale team always utilizes the latest technology to achieve the highest level of performance, availability and security. Furthermore, we are well versed in a variety of frameworks and programming languages (PHP, .NET, Java, Ruby and others), which enables us to design hosting architectures in an application centric manner.
